

## cs 15R36N

- Versatile product that moves South well
- Full resistance to Brown Stem Rot
- Great IDC tolerance

RELATIVE MATURITY	1.5	EMERGENCE	7.5
FLOWER TYPE	P	STANDABILITY	7
PUBESCENCE	LT	PHYTOPHTHORA ROOT ROT	6.5
PLANT TYPE	M	IRON DEFICIENCY CHLOROSIS	7.5
PLANT HEIGHT	M	BROWN STEM ROT	9
SOIL TYPE	LMH	WHITE MOLD	6
GENE TYPE	RPS1C	SUDDEN DEATH	7

RATINGS	HILUM	SOIL TYPES	PUBESCENCE	PLANT HEIGHT	FLOWER TYPE	CANOPY TYPE
1 = Poor 9 = Excellent	Y = Yellow BI = Black IB = Imperfect Black BU = Buff BR = Brown	L = Light (2-3% O.M, <6.5pH) M = Medium (4-6% O.M, 7.0pH) H = Heavy (7-10% O.M, >7.5pH)	LT = Light Tawny T = Tawny G = Gray	M = Medium MT = Medium-Tall T = Tall	W = White P = Purple	M = Medium MB = Medium-Bush B = Bush MT = Medium-Thin

### NOTES

---

---

---

---

## SOYBEAN PIRACY STATEMENT

Seed containing a patented trait can only be used to plant a single commercial crop from which seed cannot be saved and replanted. Examples of seed containing a patented trait include but are not limited to Genuity® Roundup Ready 2 Yield® Soybeans, and Roundup Ready 2 Xtend® Soybeans. Additional information and limitations on the use of these products are provided in the Monsanto Technology Stewardship Agreement, the Monsanto Technology Use Guide, and Roundup Ready 2 Xtend® Soybean Technology Use Guide Supplement. U.S. patents for Monsanto technologies can be found at the following webpage: <http://www.monsantotechnology.com>

## LIBERTYLINK® PATENT STATEMENT

Soybean seeds containing LibertyLink® are protected under multiple U.S. patents and may be planted only to produce one (1) commercial crop, and only after signing a Bayer Grower Technology Agreement. It is illegal to save or catch soybean seeds containing the LibertyLink trait for use as planting seed or for transfer to others for use as planting seed.

## BENEFITS OF NEW SEED

By purchasing new seed, you get higher yields, reliability, consistency and the risk management benefits that you would not get with bin-run seed. Additionally, most soybeans are covered by a variety patent, so you cannot save and plant the seeds without a license. Higher seeding rates may be required for bin-run, compared to new branded seed. Loss of seed or shrink occurs during seed cleaning and handling processes for bin-run seed, and income lost by not selling a bushel of soybeans is saved for planting the next year.

## MONSANTO STATEMENT

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Certain products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Growers should refer to <http://www.biotechstatus.com/> for any updated information on import country approvals. Excellence Through Stewardship® is a registered trademark of Biotechnology Industry Organization.

**ALWAYS READ AND FOLLOW DIRECTIONS FOR USE ON PESTICIDE LABELING. IT IS A VIOLATION OF FEDERAL AND STATE LAW to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® Soybeans. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. IN CROP USES MAY NOT BE APPROVED IN ALL STATES.** Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® Soybeans.

Roundup Ready 2 Xtend® Soybeans contains genes that confer tolerance to glyphosate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Contact your Monsanto dealer or refer to Monsanto's Technology Use Guide for recommended weed control programs. B.t. products may not yet be registered in all states. Check with your Monsanto representative for the registration status in your state.

**IMPORTANT IRM INFORMATION:** RIB Complete® corn blend products do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. SmartStax® RIB Complete® corn blend is not allowed to be sold for planting in the Cotton-Growing Area. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements. DroughtGard® Hybrids with RIB Complete® corn blend the refuge seed may not always contain DroughtGard® Hybrids trait.

**ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.** Roundup Ready® technology contains genes that confer tolerance to glyphosate, an active ingredient in Roundup® brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate.

DroughtGard®, Genuity®, RIB Complete and Design®, RIB Complete®, Roundup Ready 2 Xtend®, Roundup Ready 2 Yield®, Roundup®, Roundup Ready, Roundup Ready 2 Technology and Design®, SmartStax®, VT Double PRO®, VT Triple PRO®, VaporGrip®, and XtendiMax® are trademarks of Monsanto Technology LLC. LibertyLink® and the Water Droplet Design® are registered trademarks of Bayer. Herculex® is a registered trademark of Dow AgroSciences LLC. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. All other trademarks are the property of their respective owners.
